THOMAS THE TANK ENGINE & FRIENDS

THOMAS THE TANK ENGINE

It's full steam ahead once again for Thomas. He's had a busy week at the station and now it's time to start his new engine to be run as fast. The Fat Controller's best is waiting with all the special tips he has to prepare. It's a good job that he has Thomas and his friends to help again. He says Thomas says:

"Now Thomas," he says, "I have selected some very important jobs for you to do this week. I want that you will be your best and that you will be very careful."

"Oh yes sir," says Thomas. "You know how fast that we. I want to be a really useful engine."

"There are the jobs you must do," the Fat Controller says. "Take the children to the station, take a train to the station for the broken bridge, take some

material to the bridge, deliver some logs to the station and coal to the power station, deliver the mail and finally take some oil to the oil refinery. Now there is a lot to do and you must do it. You can do the jobs in any order for each one must be finished before the next one starts."

"All right sir, I will better get started," says Thomas as he hurries out to the first job.

By now you'll know Thomas as he goes to complete all of his jobs before the week is over. But must you be other jobs on the track otherwise you may crash. On the normal level you will also have to watch your speed as there are places that have fallen on the track. You will have to find another way around them. You may crash off the track if you try to go around the corners too quickly. Complete each task before the sun goes down or the who will be given to another engine to finish up and help Thomas complete all his tasks - it's a GREAT JOB!

The game features an easy version for the youngest and a harder version for the game players in the house.

LOADING INSTRUCTIONS

Insert the game tape into
player. Press down STOP
and press RUN-STOP
Start the tape.

CONTROLS

Use a joystick in port 2
to move Thomas
around. Press fire
to choose options.

SPACE - Pause
RUN-STOP - Abort
